Education

Bachelor of Technology in Computer Science Engineering, Vishnu Institute of Technology

2022 - 2026

Skills

- **Programming Languages:** Java, JavaScript, TypeScript, Python
- **Web Development:** NextJs, MERN, HTML, CSS, FastAPI
- **Android Development:** React Native, Flutter
- **UI/UX Design:** Figma, WebFlow
- **Databases:** MongoDB, PostgreSQL, Google Firebase, SQL, GraphQL
- **Cloud:** AWS, Google Cloud
- **Tools and frameworks:** Git, GitHub, Docker,

Experience

SELF-EMPLOYED | FREELANCE DEVELOPER

ongoing

Ai Smart Labs Solutions LLP

- Developed **two full-stack applications**, including one for a startup and another for a clothing showroom with **e-commerce functionality**. Designed and built seamless **ordering systems**, integrated secure **payment gateways**, and ensured a scalable, user-friendly experience tailored to business needs

FULL STACK DEVELOPER INTERN

August 2024 –January 2025

Ai Smart Labs Solutions LLP

- Developed and enhanced a **University Management System** serving a **large client base**, improving the **UI/UX** for a more seamless user experience. Designed and optimized **RESTful APIs** to ensure better relevance and efficiency. Integrated multiple **learning platforms** into a unified system, streamlining access for students and faculty. Contributed to both **admin** and **client-side** applications, ensuring a robust and scalable solution.

FRONT END DEVELOPER INTERN

January 2024 – May 2024

Enlignence Technologies

- Developed the **frontend design** for an **Automated Interview System**, transforming **Figma designs** into a fully functional, responsive interface. Worked on both **frontend and backend**, designing **RESTful APIs** and ensuring seamless integration between the UI and backend services. Focused on building a scalable and efficient system to enhance the interview automation process.

Projects

- **ShyamSilks: E-commerce application** with a complete **ordering system**, built for both **admin and client-side applications**. Integrated **secure payments** and **webhooks** for real-time order updates and seamless transaction processing.
- **Ai Resume Builder:** Developed an **AI-powered resume builder**, integrating **Google Gemini AI** for **ATS optimization**, professional enhancements, and **customizable templates**.
- **EduVeekshan :** AI-powered chatbot using a fine-tuned **LLAMA 3.1** model aligned with **NCERT, SSC, and ICSE syllabus**, integrating real-time video generation to provide personalized learning experiences and enhance student engagement.
- **IOS legacy WhatsApp :** Developed a **legacy iOS WhatsApp**, implementing real time **texting, status updates, video/audio calls, and profile privacy settings** for a seamless user experience.
- **Automated Interview And Grading System :** Mock interview platform allowing students to assess their performance via question answering, link: skill2030.

Certifications And Awards

- HACKERRANK - [Problem Solving \(Basic\)](#), [Python \(Gold\)](#), [SQL \(Basic\)](#), [SQL \(Intermediate\)](#)
- UDEMY - [React and Next js Certification](#)
- TWO STAR LEETCODER - solved over 250+ problems by enhancing problem solving abilities.
- AICTE ANDROID DEVELOPMENT CERTIFICATION: learnt kotlin fundamentals

Volunteering Experience

- **Open Source Co Lead** at Google Developer Groups On Campus VITB (2024 - 2025)
- **Organized a workshop for 500+ participants**, providing hands-on learning opportunities in open-source development.
- **Led a college-wide hackathon with 100+ teams**, fostering innovation, collaboration, and problem-solving skills among students.
